

# THE GREENS TEAM

**Charles Jago**, a current Greens councillor and candidate for mayor, leads the Greens team. A long-term local resident, he understands local issues such as transport, childcare, libraries and sustainability. His professional experience includes the energy, information technology, adult education and community development sectors.

**Pauline Tyrrell**, during her 12 years as a Greens Councillor on Canada Bay Council, championed residents' rights, promoted community programs and lobbied for a new primary school for Concord West. She is now a Canada Bay Bushcare volunteer.

**Alice Mantel's** diverse career as a lawyer has included work in the criminal, civil, and family areas of law. She now writes professionally on women, aged care, retirement and the law.

**Sundar Mahtani** is a tenant advocate from Concord West with a background in community groups like the King Street Area Residents' Group.

**Jan Finkelstein** is a retired primary school teacher who has lived in Concord West for nearly 40 years.

**Steve Maxwell**, a retired plumber, artist, soapbox orator and writer, has lived in Chiswick for 32 years.

# KEY ISSUES NOW

**Your vote for Charles Jago and the Greens is a vote for a more liveable future for residents. Here are the key issues:**

## Overdevelopment 过度开发

The Greens are the only party consistently challenging the large-scale overdevelopment being created by the NSW Government, which favours big developers' high-rise towers and profits above community needs.

## Climate 气候

Charles Jago has initiated council policies to reduce emissions, increase renewables, and treat climate change as an emergency.

The Greens are leading the push in local government for substantially more effective policies to reduce carbon emissions and prepare councils to prevent and mitigate catastrophic climate change with better policies in planning, development and council operations.

## A new local public high school: 一所新的本地公立中学

Canada Bay LGA needs a new local public high school. One new high school in Wentworth Point will not be enough.

## Increase affordable housing 增加可负担住房

With the government forcing additional dwellings on Canada Bay LGA, this is the time to ensure a mix of additional affordable housing.

# Re-elect CHARLES JAGO

## for Canada Bay Council

## Greens priorities for Canada Bay

- 1 Reduce overdevelopment
- 2 Environmentally sustainable policies
- 3 Increase affordable housing
- 4 A new local public high school

과도한 개발을 줄이기  
환경적으로 지속가능한 정책  
저렴한 주택 공급 늘리기  
신규 공립 고등학교

## CHARLES JAGO

and the Greens team  
for Canada Bay Council

# Vote 1

Council election: Saturday, 4th September 2021

## YOUR GREENS COUNCILLOR

... is on your side

Since Charles Jago joined the Canada Bay Council in 2017, he has worked consistently to represent the residents of this area. He has opposed motions for excessive development, supported local heritage, and

supported improvements to emissions targets and waste recycling.

Charles Jago was Deputy Mayor in 2018/2019. He chairs Council's Environment Advisory Committee, and is the nominated councillor for library matters.

Successful motions Charles has introduced in Council (most unanimously) include:

- Declaration of a climate emergency
- Support for marriage equality
- Divestment of Council investments to banks which do not lend to fossil fuel projects.
- Electric car charging facilities in all new large residential developments.
- All future Council energy purchases from 100% renewable energy providers.
- Better Council reporting on trees removed on private land.

## OVERDEVELOPMENT

过度开发

**The Greens speak for the community, not developers. We don't take developer or corporate donations. The Greens support good development which will meet residents' needs.**

**However, the NSW Government is imposing unsustainable development, while promised infrastructure (such as rapid transit along Parramatta Road – buses or light rail) is overdue.** The NSW Government has tilted the planning rules in favour of developers, and has removed many council powers.

The NSW Government plans for 20-storey or more high-rise developments for Rhodes, and for Concord and Five Dock along Parramatta Road, leaving our community to deal with overcrowded trains, roads, schools, hospitals and reduced open space.

## LOCAL PUBLIC HIGH SCHOOLS

本地公立中学

Residents with high-school age children understand the difficulty in getting students into local schools.

The NSW Government's plans for major development mean that current plans – already under pressure – won't be enough for many thousands of new residents, even with the new high school promised to open in 3 years in Wentworth Point.

## ENVIRONMENT

环境

The Greens make environmental sustainability a priority in every Council policy and activity. Housing codes and standards, management of public land, water usage, investment of public funds, and procurement standards must all follow principles of sustainable population and consumption. The Greens support making Parramatta River swimmable again and protecting and enhancing our green spaces and tree cover.

## AFFORDABLE HOUSING

可负担住房

The Greens are encouraging Council to expand genuinely affordable housing and lobby for more social housing, including public housing. Our vibrant community needs appropriate housing for older and disabled people as well as young families. We support medium density developments with open space and more community facilities, rather than high-rise towers.
